

Integrated for Success

Why did DSD Business Systems and LeaseQuery partner?

Many companies underestimated the effort and cost needed to adopt the ASC 842 lease accounting guidance and are scrambling to achieve compliance. That's why **DSD Business Systems** and **LeaseQuery**, the market leader for lease accounting, partnered.

The deadlines for mandatory compliance are here. Your accounting team is likely working hard to transition and maintain compliance. LeaseQuery is focused on simplifying lease accounting complexities and demystifying the lease accounting process for your team.

To ease the pain of transition, save time and resources, and ensure compliance, you need software designed specifically for lease accounting. Not only that, but you need a vendor that understands best practices for accounting and serves as the thought leader in the space.

Why did LeaseQuery and Acumatica integrate?

The integration between LeaseQuery and Acumatica **simplifies lease accounting** for users, **maximizes time savings**, and **eliminates substantial mistakes** by automating the journal entry and accounts payable processes for leased assets. **LeaseQuery is the only certified lease accounting integration for Acumatica.**

Here are several key benefits from the integration:

- ✓ Automate journal entries to the general ledger giving hours back to your team
- ✓ **For lessees:** automate Accounts Payable process for leased assets
- ✓ **For lessors:** Maximize time spent in ERP, improving user experience and efficiency
- ✓ Eliminate human error and reduce risk by using the integration to post your entries
- ✓ Streamlined seamless workflow creates time for additional projects

LeaseQuery is the only Acumatica Certified Integration for lease accounting. Simplify your compliance and get reports at the push of a button.

What's included in the integration?

With LeaseQuery's integration with Acumatica, LeaseQuery customers are able to send lease data directly to the General Journal and drive the Accounts Payable Process within Acumatica. A user can complete the AP process by transmitting a check run directly into Acumatica. Plus, spot check journal entries for accuracy before formally posting to the General Journal. LeaseQuery's integration via **LeaseQuery Connect** pushes lease data into Acumatica making your transition easier than ever and simplifying the long term management of your leased asset portfolio. *Take advantage of streamlined workflows, less human error and a better user experience for your staff by [requesting a demo today](#).*

LeaseQuery and Acumatica are partnered and integrated for your success!

About LeaseQuery

LeaseQuery helps more than 28,000 accountants and finance professionals globally eliminate lease accounting errors through its CPA-approved lease accounting software. It is the first lease accounting software built by accountants for accountants.

By providing specialized consulting services in addition to its software solution, LeaseQuery facilitates compliance with the most comprehensive regulatory reform in 40 years for companies across all sectors.

About DSD Business Systems

Founded in 1984, DSD Business Systems is an award-winning Business Management Software provider serving small & mid-sized organizations throughout North America. Our #1 goal is to energize the growth of businesses around the world by pairing smart technology with imagination. "It's not as though we're especially gifted.
