DSD + LeaseQuery

Integrated for Success

sage Intacct

Why did DSD Business Systems and LeaseQuery partner?

Many companies underestimated the effort and cost needed to adopt the ASC 842 lease accounting guidance and are scrambling to achieve compliance. That's why **DSD Business Systems** and **LeaseQuery**, the market leader for lease accounting, partnered.

The deadlines for mandatory compliance are here. Your accounting team is likely working hard to transition and maintain compliance. LeaseQuery is focused on simplifying lease accounting complexities and demystifying the lease accounting process for your team.

To ease the pain of transition, save time and resources, and ensure compliance, you need software designed specifically for lease accounting. Not only that, but you need a vendor that understands best practices for accounting and serves as the thought leader in the space.

Why integrate?

The integration between LeaseQuery and Sage Intacct **simplifies lease accounting** for users, **maximizes time savings**, and **eliminates substantial mistakes** by automating the journal entry and accounts payable processes.

The LeaseQuery and Sage Intacct integration elevates your Sage Intacct ERP Why integrate? platform, giving you efficient, accurate lease accounting to ensure your ASC 842 compliance by tracking all your company's real estate and equipment leases in a single sub-ledger.

Here are several key benefits from the integration:

☑ *Automate journal entries to the general ledger giving hours back to your team*

☑ *Automate Accounts Payable process for leased assets*

☑ *Maximize time spent in ERP, improving user experience and efficiency*

☑ *Eliminate human error and reduce risk by using the integration to post your entries*

☑ *Streamlined seamless workflow creates time for additional projects*
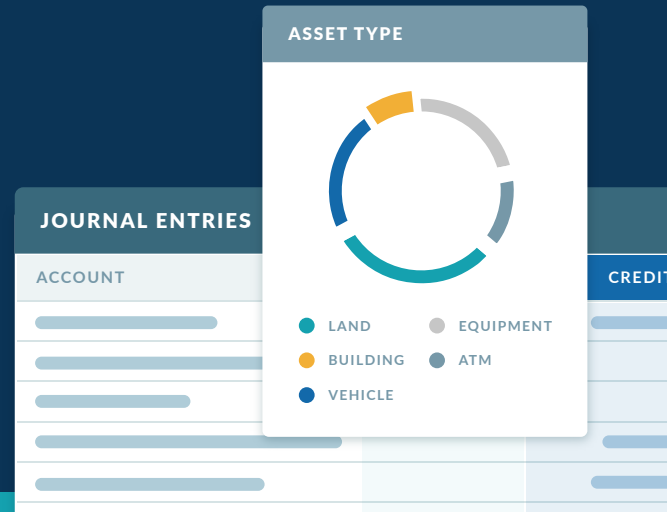

What's included in the integration?

With LeaseQuery's integration with Sage Intacct, we are able to send lease data directly to the General Journal and drive the Accounts Payable Process. A user can spot check entries for accuracy before formally posting to the General Journal and complete the AP process by transmitting a check run directly into Sage Intacct with one click! LeaseQuery pushes data into Sage Intacct making your transition easier than ever and simplifying the long term management of your leased asset portfolio.

LeaseQuery and Sage Intacct are integrated for *your* success!

Take advantage of streamlined workflows, less human error and a better user experience for your staff by requesting a LeaseQuery demo today.

About DSD Business Systems

Founded in 1984, DSD Business Systems is an award-winning Business Management Software provider serving small & mid-sized organizations throughout North America. Our #1 goal is to energize the growth of businesses around the world by pairing smart technology with imagination. "It's not as though we're especially gifted. But we have been exceptionally determined. If you're able to enjoy something, to devote your life to it, it will work out for you. It will work."– Doug Deane, Founder

About LeaseQuery

LeaseQuery helps more than 10,000 accountants and other finance professionals eliminate lease accounting errors through its CPA-approved lease accounting software. It is the first lease accounting software built by accountants for accountants. By providing specialized consulting services in addition to its software solution, LeaseQuery facilitates compliance with the most comprehensive regulatory reform in 40 years for companies across all sectors.
