

Data sheet

Sage Intacct Ministry Intelligence

Bring together your giving, revenue, and expense data to streamline operations and enhance stewardship.

As a pastor or finance leader, you know firsthand the frustration, inefficiency, and lack of insight from managing multiple systems and data sets in your church management and financial management systems.

Sage Intacct Ministry Intelligence marries together the detailed giving data from your church management system with your revenue and expense data in your financial management system, giving you the real-time insight your ministry needs.

Enhance stewardship and foster church community

Bringing together all your key data gives you the ability to continuously monitor what matters to your congregation. Gain insights into donor giving patterns like total giving, first-time or continued giving, giver retention rate, sustaining versus ad-hoc giving, top givers, and more. From administrative to pastoral staff, daily KPI tracking puts the right data into the hands of the right stakeholders. This gives the insight you need to understand giving patterns and identify need for pastoral outreach to enrich congregant conversations.

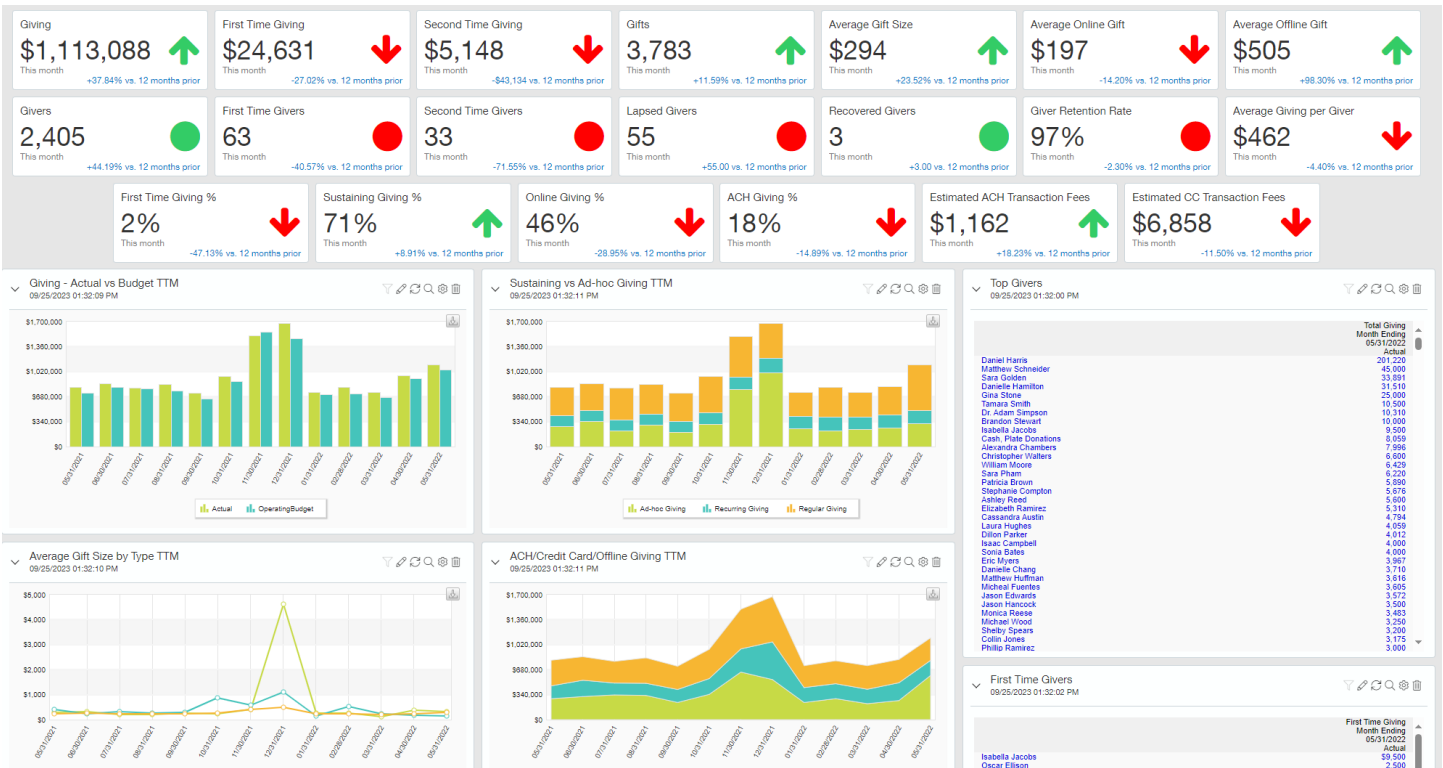

The right insights to support strategic decision-making

Take the guesswork out of tracking key performance indicators with pre-packaged metrics based on industry best practices. Dashboards and reports increase collaboration across your leadership team with real-time access to data that can be used to improve your processes and purpose. Utilize these metrics to realize insights for key financial decision-making like expanding programs, opening new locations, or improving oversight on multiple locations.

Streamlined flow of operational and financial data

The flexible integration between Sage Intacct and your church management system allows you to choose which fields or dimensions to map and at what level of detail. This provides you access to a comprehensive and reliable view of data in one single location. Automatic data flow eliminates error-prone and duplicative manual processes, improves the accuracy of your data, and ensures seamless reconciliations and audits.

Easily visualize congregation giving trends with dashboards like this giving analysis dashboard.

“Ministry Intelligence is a game changer. It is a one-stop shop where you can access executive finance data alongside ministry metrics. We can now track the most critical data from various sources all in one platform, freeing up valuable time for pastors, administrators, and staff. By observing giving patterns, it allows us to identify the health of our church, and reach out to individuals when their financial situation seems different, turning this insight into a powerful tool for caring and connecting with our congregation.”
