SAGE 100 INTEGRATION

IN-SYNCH® is a Sage 100 installed application that provides real-time data synchronization with any third-party system. It can be used to integrate and synchronize with just about any version of Sage 100 and its predecessors.

IN-SYNCH is a flexible tool that can be used for multiple types of integration needs—from just the basics to complex, customized systems. We specialize in Sage 100 process automation, from intercompany transactions to tokenized credit card integration. IN-SYNCH is infinitely versatile, able to be expanded to complex solutions that will pay dividends in return on your investment.

ROI has more than 25 years of experience integrating Sage 100 with other solutions; our expertise with Sage 100 has proven invaluable to our customers. Our engineers can assess the solution needed to integrate your Sage 100 platform with e-commerce sites, third-party shopping carts, custom sites or databases, and any other system. Because we completely understand the Sage 100 file structure and how to integrate using the third-party platform, we can perform most any type of integration necessary for Sage 100.

“IN-SYNCH has been such a value-added program to our business. From order processing to real-time inventory updates, we are able to add data to and from Sage 100 at a more efficient level than we ever had before.”

CHRIS RAMCHARRAN

CTO

LogoUp

TURKEY INTEGRATION

For off-the-shelf and custom carts that offer an API, we can create a Sage 100 custom cart connector for a turnkey integration solution.

With experience integrating over 20 different popular shopping carts, marketplaces, and omni-channels, IN-SYNCH gives you the convenience of selecting the platform with the budget and features that suit your business and integrating it quickly and efficiently. The following are our most popular integrations:

E-COMMERCE PLATFORM INTEGRATION

amazon

- Amazon Seller Central: MFN and FBA
- Amazon Payments Report

BIGCOMMERCE

- B2B Edition
- MiniBC

shopify

- Shopify POS
- Shopify Fulfillment Service

WOO COMMERCE

ebay

Adobe Commerce

SHIFT4SHOP

Walmart Marketplace

IN-SYNCH is capable of integrating any website shopping cart platform with Sage 100.

IN-SYNCH CONNECTOR API

With our IN-SYNCH Connector API, we can assist Sage 100 partners and customers in meeting just about any integration challenge. We have created a series of endpoints that we establish ahead of time to allow companies to interact with our connector and the database, thus allowing the developer to now push and pull data via these endpoints. They can control the access without needing to host a database and they do not need to have extensive knowledge of the Sage 100 table structure.

The Connector API allows us to work with the end user and/or developer to choose the best option for project architecture, requirements, etc. A hybrid integration may even be used as we have users with flat files that transfer along with an endpoint to connect with their solution.

“Offering the option of the IN-SYNCH Connector API has opened the doors to so many more customer projects. Our customers’ developers now have a tool that enables them to offer a completely integrated solution to their customers.”

Bob Richter

DSD Business Systems

DO IT YOURSELF

Your developer can perform the integration to Sage 100 using IN-SYNCH, rather than engaging ROI to perform the turn-key integration. You can contract with ROI to perform parts of the Sage 100 connection, or we can train your team to do this work.

SAGE 100 AUTOMATION

Inter-company Integration - With IN-SYNCH®, we can automate the intercompany workflows and eliminate the inefficiencies caused by manual postings.

OTHER CONNECTIONS

- 3PL Integration - If your business is offering fulfillment services or using a third-party shipping and logistics outsource (3PL), ROI can perform the automation of data between the online platforms and Sage 100
- CRM Integration - IN-SYNCH enables the real-time, bi-directional exchange of contact information and order history no matter where the data are entered
- XML Integration - One of our popular integrations with XML to automate the retrieval of files and the import into Sage 100 to create accounts receivable invoices, orders, accounts payable invoices, purchase orders and so on
- Connect Sage 100 with other ERP solutions
- And More!

REAL-TIME DATA SYNCHRONIZATION WITH ANY THIRD-PARTY SYSTEM

CONNECT WITH CONFIDENCE

IN-SYNCH® DOES MORE TO INTEGRATE ONLINE BUSINESS WITH SAGE 100 THAN ANY OTHER INTEGRATION SOLUTION.

FEATURES AND BENEFITS OF OUR INTEGRATION SOLUTION

Proven: Our solutions are proven, mature, and bug-free. You can rest assured that you will not be our “trial and error” project.

Secure: Data exchanges are initiated and controlled from within the Sage 100 server, making IN-SYNCH the most secure architecture possible.

Bidirectional: Integrate and synchronize all relevant data between Sage 100 and the third-party system, whether the data originates in Sage 100 or the external system.

Independent: The two systems run independently, so if one happens to be down for maintenance, the other system stays up. The two will sync up automatically.

Lightning Fast: Efficient data mirroring methods are available for maximum speed.

Real-time: Automatically synchronize changes and updates as they occur.

A POWERFUL PARTNER

DSD Business Systems is a Sage Tech Partner; we work closely with Sage 100 resellers as an extension to their own technical team. Together, we enable Sage 100 customers to get the most out of their investment through integration to critical applications. You can find IN-SYNCH on the Sage Marketplace.
